PROFESSIONAL EXPERIENCE

Software Developer (Full Stack) — 2017 – 2022
Just Focus Pty Ltd, Melbourne, Victoria, Australia

I engineered and managed MySql databases for web and desktop platforms. At Just Focus Pty Ltd, I developed and deployed a lead management application using jQuery, CSS, HTML, JavaScript, and React. I collaborated with users to enhance system efficiency and refined front-end and back-end features. Additionally, I maintained web applications, making small tweaks and significant updates using jQuery, PHP, and React.js.

Software Engineer (Full Stack) — 2014 – 2016
Central Finance Company Plc, Colombo, Sri Lanka

In addition to my work at Just Focus Pty Ltd, I developed and implemented lead management software for Central Finance Company using ASP.Net, jQuery, CSS, and HTML. I worked directly with end-users to enhance efficiency and user-friendliness, also providing training support. I maintained web applications with jQuery, PHP, and React.js, and developed MySql and Oracle databases for both existing and in-development applications, ensuring robust data management across platforms.

Software Engineer (Full Stack) — 2010 – 2014
Dipro Information Systems (Pvt) Ltd, Colombo, Sri Lanka

In addition to my work at Just Focus Pty Ltd and Central Finance Company, I developed JavaScript and jQuery functions to meet specific requirements and played the role of a C# developer to implement functionalities. I ensured timely delivery with continued integration and deployment, and designed end-user applications using HTML, CSS, JavaScript, and PHP. I also wrote end-user documentation and was fluent in SQL queries, building databases with MySQL and Oracle.
